OBJECTIVES
1. Explore both Organizational Resilience and ERM models for a campus environment. Roundtable participants will explore both the challenges and opportunities of the two approaches and review tools, resources, and maturity models
2. Share and discuss lessons learned from developing holistic, enterprise-wide views of what the critical risks to the achievement of your institution's mission and objectives
3. Provide networking opportunities for participants to connect with Organizational Resilience and Enterprise Risk Management leaders at other colleges and universities

Sponsored by:
University of Oregon | University of California-San Francisco
Simon Fraser University | Washington State University

Disaster Resilient Universities (DRU) Network®
The goal of the DRU Network is to facilitate open communication, discussion, and resource sharing among university/college practitioners of all areas of expertise. A cornerstone of resilience is establishing effective partnerships. The peer-to-peer information sharing among DRU members helps them and others mitigate, prepare for, respond to, operate during, and recover from all types of campus emergencies. Collectively and professionally we can strengthen the resilience of universities and colleges by sharing our experiences, strategies, technical resources, processes, and lessons learned.
